INTERNATIONAL PREDMINARY EXAMINATION REPORT

In ional application No.	
PC17US99/25963	

	Basis of the report	l
1.	With regard to the elements of the international application:*	
-	the international application as originally filed.	
	the description:	
	pages 1-13 as originally filed	
	pages NONE , filed with the demand pages NONE , filed with the letter of	
	the claims: pages 14-16, as originally filed	
	pages NONE, as amended (together with any statement) under Article 19	İ
	pages NONE filed with the demand	
	pages NONE , filed with the letter of	
	the drawings:	
	pages 1-3 , as originally filed	
	pages NONE , filed with the demand pages NONE , filed with the letter of	
	the sequence listing part of the description:	
	the sequence fisting part of the description. pages NONE as originally filed	
	pages NONE, as originally filed pages NONE, filed with the demand	
i	pages NONE filed with the letter of	
2.	With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language which is:	
	the language of a translation furnished for the purposes of international search (under Rule23.1(b)).	1
	the language of publication of the international application (under Rule 48.3(b)).	
	the language of the translation furnished for the purposes of international preliminary examination (under Rules	
	55.2 and/or 55.3).	
3.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:	
	contained in the international application in printed form.	
	filed together with the international application in computer readable form.	1
	furnished subsequently to this Authority in written form.	
	furnished subsequently to this Authority in computer readable form.	
	The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.	
	The statement that the information recorded in computer readable form is identical to the written sequence listin has been furnished.	g
4	The amendments have resulted in the cancellation of:	
1		
	the description, pages NONE	
	the claims, Nos. NONE	
	the drawings, sheets/fig NONE	
	This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**	
ہا۔	Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17). ** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.	

NARY EXAMINATION REPORT INTERNATIONAL PRE

ĺ	In tional application No.
	PCT/US99/25963

YES

V.	Reasoned statement under Article citations and explanations suppor	le 35(2) with regard to novelty, inventive step or industrial applicability; rting such statement			
1.	STATEMENT				
	Novelty (N)	Claims 1-33 Claims NONE	YES		

Claims NONE

Inventive Step (IS) NO Claims 1-33_

YES Claims 1-33 Industrial Applicability (IA) NO Claims NONE

2. CITATIONS AND EXPLANATIONS (Rule 70.7)

Claims 1-33 lack an inventive step under PCT Article 33(3) as being obvious over HAYNESWORTH, et al. (US Patent No. 5,733,542) in view of BRUDER, et al. (US Patent No. 5,536,396) and in further view of DONNELLY, et al. (Exp. Eye Res. 56:157-165, 1993).

The '542 patent teaches a method of administering mesenchymal stem cells (MSCs) to promote autologous or allogeneic engraftment of transplanted tissue (see the abstract, col. 1, lines 17-36 and 50-67 and col. 2, lines 53-63). The '542 patent does not specifically teach fibroblasts. However, the '396 patent teaches that MSCs differentiate into fibroblasts (see Figure 1) and human cells in col. 11. The various times of administration of the fibroblasts, as recited in claims 7-9 is taught by the '542 patent in col. 2, line 67 and bridging over to col. 3, line 6. The '542 and '396 patents do not teach a method whereby the fibroblasts are administered to treat rejection of the transplant by the recipient, as recited in claim 11. However, DONNELLY, et al. teach that fibroblasts produce cytokines which inhibit allogeneic reactions in corneal transplants (see the abstract, in particular). One of ordinary skill in the art would have a reasonable expectation of success in using allogeneic fibroblasts to inhibit an immune response to alloantigens, given the combined teachings of the references. Also one of ordinary skill in the art would recognize that the organs recited in claim 15 are commonly transplanted organs and would have had a motivation to use the methods of the '542 and '396 patens to reduce an immune response against a transplanted tissue, given the teaching by DONNELLY, et al., that fibroblasts produce cytokines that inhibit an immune response against alloantigens. Therefore, it would have been prima facie obvious to one of ordinary skill in the art to have arrived at the claimed invention given the combination of reference, absent evidence to the contrary.

----- NEW CITATIONS -----US 5,733,542A (HAYNESWORTH, et al.) 31 March 1998, see entire document.

US 5,736,396A (BRUDER, et al.) 07 April 1998, see entire document.

INTERNATIONAL SEARCH REPORT

hamational application No.

PCT/US 99/25963

DOX I	Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)
This int	emational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. X	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely: Remark: Although claimS 1-32 are directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the compound/composition.
2.	Claims Nos.: because they relate to parts of the international Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third semiences of Rule 6.4(a).
Box ii	Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)
This int	ernational Searching Authority found multiple inventions in this international application, as follows:
1.	As all required additional search fees were timely paid by the applicant, this international Search Report covers all esarchable claims.
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
з. 🔲	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4.	No required additional search fees were timely paid by the applicant. Consequently, this international Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark	The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.
